PROFESSIONAL SUMMARY

Senior Unity Game Developer with 8+ years of experience building and shipping production mobile games for Android and iOS, including a title with 1M+ downloads. Experienced in gameplay architecture, FSM- and NavMesh-based AI, progression, inventory and crafting, persistence and save migration, monetization, analytics, and mobile UI. Proven ability to build original systems, extend inherited Unity frameworks, protect existing player data through major updates, and guide teams through production releases.

TECHNICAL SKILLS

Programming and Engine: C#, Unity, Editor Scripting, ScriptableObjects, Unity Addressables, Git, Coroutines, Event-Driven Systems

Gameplay Systems: Gameplay Architecture, Mission and Quest Systems, Progression, Inventory and Crafting, Economy, Physics Simulation, JSON Save Data, Save Migration

AI Systems: NavMesh Navigation, Finite State Machines (FSM), NPC Behaviour, Enemy Wave Systems, Obstacle Avoidance, Configurable AI Profiles

UI and Mobile: uGUI, TextMeshPro, Responsive UI, Mobile UI Implementation, User Flow Implementation, Runtime UI Generation

SDKs and Platforms: Android, iOS, AppLovin MAX, Unity IAP, Firebase Analytics, Firebase Remote Config, Tenjin, PlayerPrefs

SELECTED PROJECTS

Animal Tycoon Zoo Craft | Android and iOS | 1M+ Android downloads

Architected core gameplay, animal and visitor AI, progression, economy, persistence, monetization, analytics, and cross-platform mobile support.

Technologies: Unity, C#, NavMesh, AI Systems, JSON Save Data, AppLovin MAX, Unity IAP, Firebase

Internet Cafe Empire | Android and iOS

Extended the licensed Perfect Hotel framework; reworked Levels 2 and 3, quests, live events, rewarded-video and IAP ownership flows, SDK integrations, and backward-compatible JSON migration.

Technologies: Unity, C#, Observer Pattern, JSON Migration, AppLovin MAX, Unity IAP, Firebase, Remote Config, Tenjin

Gang Mafia Shooting Crime Game | Android and iOS | 10K+ Android downloads

Built the territory campaign and 11 missions, enemy-wave orchestration, weapon progression, gang recruitment, hybrid JSON and PlayerPrefs persistence, monetization, and analytics around the Invector foundation.

Technologies: Unity, C#, Invector, FSM, NavMesh, ScriptableObjects, Addressables, JSON, AppLovin MAX, Firebase

Alien Deep Sea Diver Game | Android and iOS | 10K+ Android downloads

Built underwater survival systems including oxygen and depth, inventory, gear, quick slots, crafting, tasks and objectives, XP progression, persistence, Firebase, Remote Config, AppLovin MAX, and Tenjin.

Technologies: Unity, C#, URP, ScriptableObjects, Inventory, Crafting, JSON Save Data, Firebase, Remote Config, AppLovin MAX

PROFESSIONAL EXPERIENCE

Senior Unity 3D Game Developer | Invouge Technology

Jun 2022 - Present

- Architected and implemented gameplay, AI, progression, economy, persistence, UI, and SDK systems across production Android and iOS games.
- Reduced mobile load times by 25% through profiling and targeted runtime optimizations.
- Integrated AppLovin MAX, Unity IAP, Firebase, Remote Config, Tenjin, and related services, contributing to a 30% increase in in-game revenue.
- Extended inherited Unity frameworks and built backward-compatible save migrations to ship major updates without resetting existing player progress.
- Contributed to multiple commercial releases, including a title with 1M+ Android downloads, while guiding cross-functional development and code reviews.

Senior Unity 3D Game Developer | HighBit Technology

Aug 2021 - Jun 2022

- Designed and implemented Unity and C# gameplay features that improved player retention by 20%.
- Led a team of five through more than 50 critical fixes, reducing crash rate by 25%.
- Developed reusable advertising modules and integrated analytics and ad-network SDKs across mobile projects.
- Improved code structure, release stability, and developer onboarding through maintainable systems and technical documentation.

Unity 3D Game Developer | BraceSol Game Studio

Mar 2021 - Aug 2021

- Developed and launched two mobile game titles from concept through production release.
- Built gameplay and mobile UI systems and collaborated with artists and designers to integrate production content.
- Profiled builds, resolved ANRs and recurring production issues, and supported compatibility across mobile device tiers.
- Introduced reusable coding standards and shared systems that reduced duplicate implementation across projects.

Unity 3D Game Developer | Echno IT Solution

Mar 2018 - Mar 2021

- Developed multiple mobile game concepts and supported their release and maintenance cycles.
- Implemented gameplay systems, mobile advertising and monetization flows, and cross-platform testing.
- Maintained technical documentation and streamlined build, upload, and release workflows.
- Collaborated with engineering, design, art, and QA teams to deliver polished gameplay updates.

EDUCATION

M.Sc. in Information Technology | University of Sargodha, Lahore Campus

B.Sc. in Computer Science | Govt. Degree College
