Professional Summary

- Results-driven Unity Game Developer with over six years of experience designing and optimizing interactive systems.
- Proven expertise in C# programming, physics simulation, editor scripting, and user interface development.
- Skilled at guiding teams to achieve performance and quality objectives.

Technical Skills

- Programming & Tools: C#, Unity3D, Editor Scripting, Custom Ads Integration, Git, Addressable, DOTs/ECS
- Gameplay Systems: Physics Simulation, Gameplay Architecture, Performance Profiling, Multiplayer Networking
- UI/UX Development: UI Framework Implementation, UX Research, Performance Optimization
- AI & Automation: Machine Learning Integration, Behaviour Tree Systems, Test Automation, Continuous Integration

Professional Experience

Sr. Unity 3D Game Developer - Invouge Technology

June 2022 - Present

- Reduced load times on iOS and Android by 25% through performance optimizations.
- Integrated third-party APIs and SDKs to boost in-game revenue by 30%.
- Architected scalable code frameworks that accelerated feature development by 20%.
- Led code review initiatives that cut production bugs by 15%.
- Evaluated and applied Unity engine updates and emerging technologies.
- Designed AI-driven gameplay behaviours to enhance player engagement and adaptability.
- Engineered NPC behaviour systems using AI models for realistic decision-making.
- Coordinated cross-disciplinary teams for iterative gameplay enhancements.

Sr. Unity 3D Game Developer - HighBit Technology

August 2021 - June 2022

- Improved player retention by 20% through design and implementation of new game features in Unity and C#.
- Led a team of 5 to resolve over 50 critical bugs, reducing crash rates by 25%.
- Developed custom Ads modules, increasing ad revenue by 15%.
- Integrated analytics and ad network SDKs to provide actionable engagement metrics.
- Authored clean, maintainable code to streamline new hire onboarding processes.
- Developed AI-driven systems for dynamic game responsiveness and complexity.
- Collaborated with cross-functional teams to deliver polished feature releases.

Unity 3D Game Developer - BraceSol Game Studio

March 2021 - August 2021

- Conceived and launched two major game titles from concept through release.
- Enhanced application stability by 20% through proactive ANR and bug fix management.
- Partnered with artists and designers to integrate dynamic visual and interactive elements.
- Established coding best practices, increasing code maintainability by 30%.
- Developed Ads integration that improved engagement metrics by 10%.
- Conducted performance profiling to ensure compatibility across devices.

Unity 3D Game Developer - Echno IT Solution

March 2018 - March 2021

- Originated and developed multiple game concepts resulting in successful releases.
- Reduced account and upload downtime by 15% through process optimizations.
- Collaborated with engineering, design, and QA teams to deliver engaging gameplay.
- Maintained comprehensive documentation to improve team efficiency.
- Implemented Ads solutions that increased monetization by 10%.
- Led cross-platform testing ensuring consistent performance.

Education

- M.Sc. in Information Technology, University of Sargodha, Lahore Campus
- B.Sc. in Computer Science, Govt. Degree College
